REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 31ST MARCH 1936.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.—The 22,548 births in the present quarter are 1,423 more than in the preceding quarter, the rate per 1,000 population, 18·2, being 1·3 above that recorded for that quarter. Compared with the standard* the number of births and the rate per 1,000 population in the quarter are 79 and 0·5 respectively below that average.

The birth-rate in the aggregate of large burghs, 19·2, is higher than in the rest of Scotland (17·1). In individual areas the rate ranged in burghs from 26·0 in Port Glasgow, 24·9 in Kilmarnock and 24·0 in Hamilton, to 14·5 in Perth, 14·9 in Rutherglen and 15·1 in Dunfermline. In counties, exclusive of large burghs, it ranged from 21·1 in Nairn, 20·9 in Stirling and 20·2 in West Lothian, to 10·5 in Kinross, 11·6 in Berwick, and 12·5 in Selkirk and in Zetland.

The proportion of illegitimate births, 6·4 per cent., is 0·4 below that for the previous quarter and 0·6 below the standard for this quarter of the year.

Of the 22,548 births registered, 11,508 were of male children and 11,040 of female children, being 104·2 male births per 100 female. Those registered in January numbered 7,539, in February 7,097 and in

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

March 7,912, the equivalent monthly birth-rates being 17·9, 18·0 and 18·8 respectively.

Marriages.—The number of marriages registered, 7,731, is 2,177 below that for the previous quarter, the rate per 1,000 population, 6·3, being 1·6 below. The number for the quarter is 291 more than the average, while the rate is 0·2 above the average.

The rate in the aggregate of large burghs is 7·3 compared with 4·9 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 12·4 in Inverness, 10·1 in Rutherglen and 9·2 in Hamilton, to 5·2 in Dumfries, 5·6 in Dumbarton and in Greenock, and 6·2 in Port Glasgow. In counties, exclusive of large burghs, it ranged from 7·9 in Nairn, 7·3 in Zetland and 6·5 in Dumfries, to 2·3 in Inverness, 3·0 in Berwick and 3·1 in Renfrew.

Marriages registered in January numbered 3,398, in February 2,119 and in March 2,214, the equivalent monthly marriage-rates being 8·1, 5·4 and 5·3 respectively.

Deaths.*—Deaths registered during the quarter numbered 20,195, and equalled a rate of 16·3 per 1,000 population. They are 3,707 more than were registered in the previous quarter, while the rate is 3·1 more. The number and the rate per 1,000 are 764 and 0·3 respectively above the average for the quarter.

The death-rate in the aggregate of large burghs is 16·8 compared with 15·8 for the rest of Scotland. The rate in individual large burghs ranged from 21·7 in Arbroath, 19·1 in Dumbarton and 18·8 in Port Glasgow, to 12·2 in Airdrie, 13·0 in Stirling, and 14·3 in Dunfermline and in Falkirk. In counties, exclusive of large burghs, it ranged from 20·6 in Selkirk, 19·9 in Orkney and in Argyll and 19·2 in Ross and Cromarty, to 11·0 in Kinross, 11·8 in Nairn and 13·6 in Clackmannan.

Deaths registered in January numbered 7,297, in February 6,462 and in March 6,436, the equivalent monthly death-rates being 17·3, 16·4 and 15·3 respectively.

Infantile Mortality.—Deaths of children aged under one year numbered 2,440 and are equivalent to an infantile mortality-rate of 108 per 1,000 registered live births. These deaths are 632 more than in the previous quarter and the rate is 22 more. Compared with the standard for the quarter the rate is 4 more. Among legitimate children the mortality was 105 per 1,000 births and among illegitimate children 161.

The death-rate for the large burghs was 114, while for the rest of Scotland it was 100. In the large burghs individually it ranged from 168 in Stirling, 154 in Clydebank and 140 in Kirkcaldy, to 58 in Inverness, 59 in Dunfermline, and 72 in Airdrie and in Arbroath. In counties, exclusive of large burghs, it ranged from 143 in Selkirk, 133 in Kirkcudbright and 130 in Dumfries, to 0 in Kinross, 20 in Sutherland and 38 in Bute.

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

Causes of Death.—Principal Epidemic Diseases.—Of the 20,195 deaths registered during the quarter, 894 or 4·4 per cent. were attributed to the principal epidemic diseases. These deaths include 126 from measles, 62 from scarlet fever, 100 from whooping-cough, 122 from diphtheria, 329 from influenza, 35 from cerebro-spinal fever and 120 others. Compared with the previous quarter the main feature in this group of diseases is an increase in the number of deaths attributed to each of them, with the exception of diphtheria. Those from measles are 85 more, from scarlet fever 3 more, from whooping-cough 53 more, from diphtheria 11 fewer, from influenza 150 more, from cerebro-spinal fever 9 more, and from other epidemic diseases 31 more. The death-rate for the group as a whole was 72 per 100,000 of population compared with an average of 138 for the quarter. The rate from measles was 3 less than the average, from scarlet fever 2 less, from whooping-cough 13 less, from diphtheria 1 less, from influenza 46 less and from cerebro-spinal fever 3 less. In the large burghs the highest rates were 1·5 in Hamilton, 1·2 in Stirling and 1·1 in Arbroath, while in the counties, exclusive of large burghs, the highest were 1·3 in Aberdeen and in Banff and 1·0 in Ayr.

Tuberculosis.—Deaths from all forms of tuberculosis, 1,017, account for 5·0 per cent. of all deaths and are 170 more than in the previous quarter. Of them 774 were ascribed to tuberculosis of the respiratory system, an increase of 100 compared with the previous quarter, 114 to tuberculosis of the central nervous system, an increase of 24, 36 to abdominal tuberculosis, an increase of 1, and 93 to other forms of tubercle, an increase of 45. The quarterly death-rate from all forms of tuberculosis is 82 per 100,000 compared with an average of 92 for this quarter, that from respiratory tuberculosis being 63 compared with the average of 69.

Malignant Disease.—Deaths from this cause numbered 1,972, account for 9·8 per cent. of the total deaths, and equal a rate of 160 per 100,000. These deaths are 38 fewer than in the previous quarter, while the rate is 8 above the average.

Respiratory Diseases.—Deaths from the principal diseases of the respiratory system, pneumonia and bronchitis, accounted for 1,892 and 1,545 respectively and show an increase in numbers compared with the previous quarter, pneumonia being 691 more and bronchitis 705 more. Pneumonia was responsible for 9·4 per cent. of the total deaths and bronchitis for 7·7 per cent. Corresponding death-rates per 100,000 population are 153 and 125 respectively. The standard rates for the quarter are 157 and 113 respectively.

It is noteworthy that, despite the severity of the weather during the greater part of the quarter, the death-rate from bronchitis is little above the normal, that from pneumonia is very slightly below, and that from influenza is very considerably below.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 133 and are equal to a rate of 5·9 per 1,000 births. This rate is 0·6 below the standard for the present quarter.

Violence.—Deaths from violence numbered 727, account for 3·6 per cent. of all deaths, and are equivalent to a rate of 59 per 100,000. These deaths are 5 more than in the previous quarter. Of the total deaths assigned to this group 115 were attributed to accidents with motor vehicles, which is 33 fewer than were recorded in the previous quarter. The death-rate from violence is 4 above the standard for the quarter.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter and in the previous quarter, and the average rate for the same quarter of the previous five years. Reference has already been made above to the principal features brought out by this table.

CAUSES OF DEATH.	Death-rates per 100,000 population.		
	1936 First Quarter.	1935 Fourth Quarter.	1931-35 Average. (First Quarter.)

REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH JUNE 1936.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.— The 23,587 births in the quarter under review are 1,039 more than in the preceding quarter, the rate per 1,000 population, 19·1, being 0·9 above that recorded for that quarter. Compared with the standard* the number of births and the rate per 1,000 population in this quarter are 31 and 0·2 respectively below that average.

The birth-rate in the aggregate of large burghs is 19·9, as compared with 18·1 for the rest of Scotland. In individual areas the rate ranged in burghs from 27·0 in Coatbridge, 26·0 in Port Glasgow, and 23·3 in Airdrie, to 14·6 in Dumfries, 14·7 in Rutherglen and 15·0 in Arbroath. In counties, exclusive of large burghs, it ranged from 20·7 in Lanark, 20·7 in West Lothian, 20·6 in Kirkcudbright and 20·2 in Aberdeen, to 11·4 in Peebles, 11·6 in Sutherland and 12·3 in Selkirk.

The proportion of illegitimate births, 6·8 per cent., is 0·4 above that for the previous quarter, but 0·1 below the standard for this quarter of the year.

Of the 23,587 births registered, 12,020 were of male children and 11,567 of female children, being 103·9 male births per 100 female. Those registered in April numbered 7,899, in May 7,923 and in June

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

7,765, the equivalent monthly birth-rates being 19·4, 18·8 and 19·1 respectively.

Marriages.—The number of marriages registered, 9,449, is 1,718 above that for the previous quarter, the rate per 1,000 population, 7·6, being 1·3 above. The number for this quarter is 1,015 more than the average, while the rate is 0·7 above the average.

The rate in the aggregate of large burghs is 8·9, compared with 6·2 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 13·1 in Inverness, 10·8 in Hamilton and 10·3 in Dumfries, to 5·9 in Coatbridge, 6·2 in Dumbarton and 6·8 in Kilmarnock. In counties, exclusive of large burghs, it ranged from 10·0 in Wigtown, 8·1 in Berwick, 8·0 in Caithness and 8·0 in Moray, to 3·1 in Inverness, 3·9 in Sutherland and 4·2 in Zetland.

Marriages registered in April numbered 3,601, in May 1,147 and in June 4,701, the equivalent monthly marriage-rates being 8·8, 2·7 and 11·5 respectively.

Deaths.*—Deaths registered during the quarter numbered 16,213, and equalled a rate of 13·1 per 1,000 population. They are 3,982 fewer than were registered in the previous quarter, while the rate is 3·2 less. The number and the rate per 1,000 are respectively 136 more and 0·1 less than the standard for this quarter.

The death-rate in the aggregate of large burghs is 13·5, compared with 12·7 for the rest of Scotland. The rate in individual large burghs ranged from 18·2 in Dumfries, 16·4 in Inverness and 16·3 in Stirling, to 9·6 in Airdrie, 9·8 in Arbroath, 9·8 in Clydebank and 10·4 in Kilmarnock. In counties, exclusive of large burghs, it ranged from 18·0 in Sutherland, 17·1 in Zetland and 16·8 in Bute, to 9·2 in East Lothian, 9·7 in Clackmannan and 10·1 in Midlothian.

Deaths registered in April numbered 5,790, in May 5,259 and in June 5,164, the equivalent monthly death-rates being 14·2, 12·5 and 12·7 respectively.

Infantile Mortality.—Deaths of children aged under one year numbered 1,678 and are equivalent to an infantile mortality-rate of 71 per 1,000 registered live births. These deaths are 762 fewer than in the previous quarter and the rate is 37 less. Compared with the standard for this quarter the rate is 5 less. Among legitimate children the mortality was 68 per 1,000 births and among illegitimate children 112.

The death-rate for the large burghs was 80, while for the rest of Scotland it was 59. In the large burghs individually it ranged from 165 in Dumfries, 127 in Stirling and 103 in Greenock, to 34 in Dunfermline, 45 in Arbroath and 48 in Port Glasgow. In counties, exclusive of large burghs, it ranged from 92 in Wigtown, 89 in Sutherland and 85 in Caithness, to 0 in Kinross and in Zetland, 14 in East Lothian and 25 in Orkney.

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

Causes of Death.—*Principal Epidemic Diseases.*—Of the 16,213 deaths registered during the quarter, 835 or 5·2 per cent. were attributed to the principal epidemic diseases. These deaths include 392 from measles, 45 from scarlet fever, 82 from whooping-cough, 81 from diphtheria, 108 from influenza, 38 from cerebro-spinal fever, and 89 others. Compared with the previous quarter the main feature in this group of diseases is a general reduction in each case (particularly marked in the case of influenza), the only exceptions being measles, which showed a considerable increase, and cerebro-spinal fever, in which the increase was slight. Deaths from measles are 266 more, from scarlet fever 17 fewer, from whooping-cough 18 fewer, from diphtheria 41 fewer, from influenza 221 fewer, from cerebro-spinal fever 3 more, and from other epidemic diseases 31 fewer. The death-rate for the group as a whole was 68 per 100,000 of population, compared with an average of 79 for the quarter. The rate from measles was 13 more than the average, from scarlet fever 1 less, from whooping-cough 9 less, from diphtheria 1 less, from influenza 10 less, and from cerebro-spinal fever 2 less. In the large burghs the highest rates were 2·6 in Stirling, 1·5 in Hamilton and 1·3 in Glasgow, while in the counties, exclusive of large burghs, the highest were 1·1 in Wigtown, 0·8 in Banff, 0·7 in Lanark and 0·7 in Orkney.

Tuberculosis.—Deaths from all forms of tuberculosis, 1,001, account for 6·2 per cent. of all deaths and are 16 fewer than in the previous quarter. Of them 740 were ascribed to tuberculosis of the respiratory system, a decrease of 34 compared with the previous quarter, 127 to tuberculosis of the central nervous system, an increase of 13, 39 to abdominal tuberculosis, an increase of 3, and 95 to other forms of tuberculosis, an increase of 2. The quarterly death-rate from all forms of tuberculosis is 81 per 100,000 compared with an average of 90 for this quarter, that from respiratory tuberculosis being 60 compared with the average of 65.

Malignant Disease.—Deaths from this cause numbered 1,920, account for 11·8 per cent. of the total deaths, and equal a rate of 155 per 100,000. These deaths are 52 fewer than in the previous quarter, while the rate is 4 above the average.

Respiratory Diseases.—Deaths from the principal diseases of the respiratory system, pneumonia and bronchitis, numbered 1,047 and 617 respectively and show a decrease compared with the previous quarter, pneumonia being 845 fewer and bronchitis 928 fewer. Pneumonia was responsible for 6·5 per cent. of the total deaths and bronchitis for 3·8 per cent. Corresponding death-rates per 100,000 population are 85 and 50 respectively. The standard rates for the present quarter are 91 and 56 respectively.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 114 and are equal to a rate of 4·8 per 1,000 births. This rate is 1·0 below the standard for the quarter. It is the lowest recorded for Scotland in any quarter for several years past, and this is the third quarter in succession in which it has shown a decline.

Violence.—Deaths from violence numbered 712, account for 4·4 per cent. of all deaths, and are equivalent to a rate of 58 per 100,000. These deaths are 15 fewer than in the previous quarter. Of the total deaths assigned to this group 147 were attributed to accidents with motor vehicles, which is 32 more than were recorded in the previous quarter. The death-rate from violence is 1 above the standard for this period.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter, the previous quarter, and the average rate for the same quarter of the previous five years. Reference has already been made to the principal features brought out by the table.

CAUSES OF DEATH.	Death-rates per 100,000 population.

REPORT

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 30TH SEPTEMBER 1936.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.—The 21,459 births in the quarter under review are 2,128 fewer than in the preceding quarter, the rate per 1,000 population, 17·2, being 1·9 below that recorded for that quarter. Compared with the standard* the number of births and the rate per 1,000 population in this quarter are 280 and 0·4 respectively below that average.

The birth-rate in the aggregate of large burghs is 17·8, as compared with 16·4 for the rest of Scotland. In individual areas the rate ranged in burghs from 23·8 in Coatbridge, 22·9 in Port Glasgow and 21·3 in Greenock, to 13·0 in Rutherglen, 13·1 in Perth and 13·3 in Arbroath. In counties, exclusive of large burghs, it ranged from 20·3 in Kirkcudbright, 18·9 in Wigtown and 18·8 in Aberdeen, to 5·9 in Bute, 8·5 in Peebles and 10·0 in Selkirk.

The proportion of illegitimate births, 6·3 per cent., is 0·5 below that for the previous quarter, and 0·7 below the standard for this quarter of the year.

Of the 21,459 births registered, 10,912 were of male children and 10,547 of female children, being 103·5 male births per 100 female.

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

Births registered in July numbered 7,587, in August 7,100 and in September 6,772, the equivalent monthly birth-rates being 18·0, 16·9 and 16·6 respectively.

Marriages.—The number of marriages registered, 11,408, is 1,959 above that for the previous quarter, the rate per 1,000 population, 9·1, being 1·5 above. The number for this quarter is 1,212 more than the average, while the rate is 0·8 above the average. It is the highest quarterly rate recorded since that for the first quarter of 1921, which was also 9·1.

The rate in the aggregate of large burghs is 11·2, compared with 6·6 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 15·2 in Inverness, 13·5 in Edinburgh and 12·9 in Rutherglen, to 7·4 in Airdrie, 7·5 in Falkirk and 7·7 in Arbroath. In counties, exclusive of large burghs, it ranged from 8·5 in Ayr, 8·5 in Stirling, 8·3 in West Lothian and 8·0 in Lanark, to 2·5 in Inverness, 2·9 in Bute and 3·1 in Sutherland.

Marriages registered in July numbered 4,681, in August 3,114 and in September 3,613, the equivalent monthly marriage-rates being 11·1, 7·4 and 8·9 respectively.

Deaths.*—Deaths registered during the quarter numbered 13,707, and equalled a rate of 11·0 per 1,000 population. They are 2,506 fewer than were registered in the previous quarter, while the rate is 2·1 less. The number and the rate per 1,000 are 450 and 0·3 respectively above the standard for this quarter.

The death-rate in the aggregate of large burghs is 11·1, compared with 10·7 for the rest of Scotland. The rate in individual large burghs ranged from 13·8 in Inverness, 13·0 in Arbroath and 12·4 in Perth, to 8·4 in Falkirk, 8·5 in Clydebank and 8·7 in Kirkcaldy. In counties, exclusive of large burghs, it ranged from 17·4 in Bute, 14·3 in Orkney and 13·5 in Roxburgh, to 8·2 in Kinross, 8·5 in West Lothian and 8·9 in Stirling.

Deaths registered in July numbered 4,696, in August 4,624 and in September 4,387, the equivalent monthly death-rates being 11·2, 11·0 and 10·8 respectively.

Infantile Mortality.—Deaths of children aged under one year numbered 1,377 and are equivalent to an infantile mortality-rate of 64 per 1,000 registered live births. These deaths are 301 fewer than in the previous quarter and the rate is 7 less. Compared with the standard for this quarter the rate is 4 more. Among legitimate children the mortality was 62 per 1,000 births and among illegitimate children 93.

The death-rate for the large burghs was 74, while for the rest of Scotland it was 51. In the large burghs individually it ranged from 127 in Perth, 120 in Dumfries and 107 in Coatbridge, to 28 in Dunfermline, 29 in Airdrie and 33 in Kirkcaldy. In counties, exclusive of large

* *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

burghs, it ranged from 90 in Clackmannan, 77 in Wigtown and 70 in Lanark and in West Lothian, to 4 in Ross and Cromarty, 15 in Zetland and 19 in Sutherland.

Causes of Death.—*Principal Epidemic Diseases.*—Of the 13,707 deaths registered during the quarter, 424 or 3·1 per cent. were attributed to the principal epidemic diseases. These deaths include 74 from measles, 29 from scarlet fever, 103 from whooping-cough, 79 from diphtheria, 49 from influenza, 27 from cerebro-spinal fever, and 63 others. Compared with the previous quarter the main feature in this group of diseases is a general reduction in each of them, with the single exception of whooping-cough, in which there was a slight increase. Deaths from measles are 318 fewer, from scarlet fever 16 fewer, from whooping-cough 21 more, from diphtheria 2 fewer, from influenza 59 fewer, from cerebro-spinal fever 11 fewer, and from other epidemic diseases 26 fewer. The death-rate for the group as a whole was 34 per 100,000 of population, which is the same as the average for the quarter. The rate from measles was 1 more than the average, from scarlet fever 1 less, from whooping-cough 1 more, from diphtheria 1 less, from influenza the same, and from cerebro-spinal fever 1 less. In the large burghs the highest rates were 0·9 per 1,000 in Dumbarton, 0·9 in Paisley, 0·8 in Motherwell and Wishaw and 0·8 in Stirling, while in the counties, exclusive of large burghs, the highest were 0·7 in Kirkcudbright and 0·6 in Clackmannan, in Moray and in West Lothian.

Tuberculosis.—Deaths from all forms of tuberculosis, 818, account for 6·0 per cent. of all deaths and are 183 fewer than in the previous quarter. Of them 588 were ascribed to tuberculosis of the respiratory system, a decrease of 152 compared with the previous quarter, 104 to tuberculosis of the central nervous system, a decrease of 23, 43 to abdominal tuberculosis, an increase of 4, and 83 to other forms of tubercle, a decrease of 12. The quarterly death-rate from all forms of tuberculosis was 65 per 100,000 compared with an average of 67 for this quarter, that from respiratory tuberculosis being 47 compared with the average of 49.

Malignant Disease.—Deaths from this cause numbered 1,921, account for 14·0 per cent. of the total deaths, and equal a rate of 154 per 100,000. These deaths are 1 more than in the previous quarter, while the rate is 3 above the average.

Respiratory Diseases.—Deaths from the principal diseases of the respiratory system, pneumonia and bronchitis, numbered 608 and 365 respectively, and show a decrease compared with the previous quarter, pneumonia being 439 fewer and bronchitis 252 fewer. Pneumonia was responsible for 4·4 per cent. of the total deaths and bronchitis for 2·7 per cent. Corresponding death-rates per 100,000 population are 49 and 29 respectively. The standard rates for the present quarter are 49 and 30 respectively.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 135 and are equal to a rate of 6·3 per 1,000 births. This rate is 0·8 above the standard for the quarter.

Violence.—Deaths from violence numbered 695, account for 5.1 per cent. of all deaths, and are equivalent to a rate of 56 per 100,000. These deaths are 17 fewer than in the previous quarter. Of the total deaths assigned to this group 151 were attributed to accidents with motor vehicles, which is 4 more than were recorded in the previous quarter. The death-rate from violence is 2 below the standard for this period.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter, the previous quarter, and the average rate for the same quarter of the previous five years. Reference has already been made to the principal features brought out by the table.

REPORT

THIS Report deals more particularly with the statistics of the fourth quarter of the year 1936, but as figures relative to the entire year are now available, a short preliminary statement of them is included. A full report of the vital statistics of the year will in due course be published in the Eighty-second Annual Report. The annual figures here given may be accepted as substantially correct, but they are provisional, and will be superseded by those appearing in the Annual Report referred to above.

The vital statistics of the year under review do not show any features of a very striking character. The birth-rate, while slightly above the very low rates recorded in 1933 and in 1935, was rather below the average,* the death-rate, for the second year in succession, showed an increase as compared with the previous year and was slightly above the average, the marriage-rate, which has been increasing for the past five years, shows a slight reduction from the rate for the previous year, and the infantile mortality-rate is also slightly above the rate for recent years. The number of illegitimate births was the lowest on record.

Births registered during the year numbered 88,920, being equal to a birth-rate of 17.9 per thousand. This number is 992 more than in 1935, slightly greater than in 1934 and 2,374 more than in 1933, but despite this it is 386 less than the five years' average. The birth-rate is 0.1 above that for the previous year but is 0.3 below the average. Illegitimate births numbered 5,735, being 6.4 per cent. of the total births. This number is the lowest ever recorded. During the previous five years the average rate was 6.9 per cent.

Marriages registered during the year numbered 37,903, the equivalent marriage-rate being 7.6 per thousand. The steady increase in the marriage-rate since 1931 has been commented upon in previous Reports, but this increase shows signs of slackening, as the marriage-rate for 1935 was only 0.2 above that for 1934 and the rate for 1936 is 0.1 below that for 1935. It is still, however, 0.5 above the five years' average. In 1933 the number of marriages, for the first time in ten years, exceeded 34,000, while in 1936 they numbered 37,903, although this number is 94 less than in 1935.

Deaths from all causes numbered 66,747 and are equal to a death-rate of 13.4 per thousand. Since 1930 the death-rate has moved within comparatively narrow limits (13.5 in 1932 and 12.9 in 1934), so that the death-rate for 1936 is slightly higher than in recent years, being 0.2 above the five years' average.

Deaths of children aged under one year numbered 7,314, this number being equal to a mortality-rate of 82.3 per thousand births, or 1.6 above the average. It is rather higher than the rates for 1933, 1934 and 1935, which were 81, 78 and 77 respectively, but is generally lower than those

* For the purposes of this Report the average is the mean of those recorded in the five preceding years, i.e. 1931-35.

recorded for years prior to 1933. Among legitimate children this rate was 80 and among illegitimate children 120. This is the first year for which these rates have been available for Scotland.

In the Report for last year attention was drawn to the marked saving in the mortality of other children of pre-school age, i.e., in those aged one to four years, but in 1936 there was an increase (from 2,202 to 2,437) in deaths of children at these ages. At every other age-period under 45, with the single exception of 15–24, there was a saving compared with 1935, while between 45 and 85 the deaths in 1936 were more numerous than in 1935. This tendency is more clearly marked when the 1936 figures are compared with the average numbers for the preceding five years. This comparison shows that, while deaths under one year have increased by 102, those for every other age-period under 45 have decreased, the total saving being 1,082. For age-periods 45 and over, on the other hand, deaths in 1936 show an increase in every case, the aggregate increase amounting to 2,890. This increase at the older age-periods was also characteristic of the deaths for 1935.

When the deaths classified by cause are compared with those for the previous year, it is found that the leading features are a large increase in the number of deaths from diseases of the heart and a considerable increase in the number from measles, while those from influenza were few in number. In the past four years deaths from heart disease have increased at the rate of about 1,000 deaths per annum, those for 1936 (13,696) being 1,171 more than in 1935 and 2,976 more than the five years' average. This increase is probably to some extent due to more definite specification of the cause of death. The 610 deaths from measles, which occurred for the most part in the second quarter of the year, numbered 469 more than in 1935, which had a very low mortality from this cause, but they were also rather more than the average number for recent years. Deaths from influenza numbered only 659, which is, with one exception, the smallest number registered from this cause since 1923. Deaths from diarrhoea numbered 1,234 and are 297 more than in the previous year and 228 more than the average. Deaths from bronchitis and pneumonia numbered 442 more than in 1935. On the other hand decreases are noted in the case of most of the principal epidemic diseases not already named. Thus deaths from typhoid fever (including those from paratyphoid) numbered 39 as against 45 in 1935, from scarlet fever 172 against 199, from whooping-cough 411 against 567, and from diphtheria 387 against 513. In the case of each of the last named, typhoid fever excepted, the deaths were also below the average.

Deaths from tuberculosis numbered 3,664, of which 2,753 were from the respiratory form. The latter are 59 fewer than in 1935, but those from other forms are 77 more, there being therefore a net increase of 18. The death-rate from all forms was 74 per 100,000, being the same as in 1935, that for respiratory tuberculosis being 55, or 2 less than in that year.

Deaths from malignant disease continue to show an increase, the number for 1936 being 7,907 as against 7,793 for the previous year. The death-rate was 159 per 100,000, being 6 above the average.

* Including typhus fever, smallpox, dysentery, erysipelas, and lethargic encephalitis.

Deaths from diseases of the respiratory system numbered 9,088 and were 497 more than in the previous year, being rather above the five years' average. Of these deaths 3,330 were ascribed to bronchitis and 4,793 to pneumonia.

Deaths from diseases and accidents of pregnancy and childbirth numbered 494, of which 195 were certified as due to puerperal sepsis. The total number is 60 less than in the previous year and 54 less than the average. They are equal to a rate of 5·6 per thousand live births, which is 0·7 less than in the previous year and 0·5 below the average.

Deaths attributed to violent causes numbered 2,825, being equal to a death-rate of 57 per 100,000, which is 2 more than in the previous year. Deaths from accidents with motor vehicles numbered 564, being 9 more than in the previous year.

A general summary of the causes of death for the year, with corresponding age distribution, is shown in Table IIa. In addition to the causes not already mentioned, increases compared with the previous year are observed in deaths from diabetes and from diseases of the skin, while decreases are noted in deaths from cerebral hæmorrhage, from appendicitis and from old age. The last named have declined almost every year for several years past, the decrease being doubtless due to more definite certification of the cause. Deaths from congenital debility and allied causes were slightly fewer than in the previous year.

REPORT OF THE BIRTHS, DEATHS, AND MARRIAGES REGISTERED IN SCOTLAND DURING THE QUARTER ENDING 31ST DECEMBER 1936.

The four main Tables comprised in the Return may be summarised as follows :—

Table I shows for the counties and the large burghs of Scotland the number of births (with distinction as to legitimacy), marriages and deaths (those from the principal epidemic diseases and of infants under one year being shown separately), together with the corresponding rates per 1,000 population.

Table II shows for Scotland the numbers and rates per 1,000 population of births, marriages and deaths for each quarter and for the whole year in each of the last ten years. Illegitimate births and deaths under one year are shown separately.

Table III shows in detail the causes of death according to the Detailed International List (adapted) in certain age groups and by sex in Scotland.

Table IV shows in Short List form the causes of death and, for all causes, the ages at death in the counties and large burghs of Scotland.

Births.—The 21,326 births in the quarter under review are 133 fewer than in the preceding quarter, the rate per 1,000 population, 17·1,

being 0·1 below that recorded for that quarter. Compared with the standard* the number of births and the rate per 1,000 population in this quarter are respectively 4 above and 0·1 below that average.

The birth-rate in the aggregate of large burghs is 17·6, as compared with 16·5 for the rest of Scotland. In individual areas the rate ranged in burghs from 23·9 in Port Glasgow, 23·5 in Hamilton and 21·7 in Airdrie, to 12·6 in Arbroath, 13·7 in Kirkcaldy and 14·3 in Perth. In counties, exclusive of large burghs, it ranged from 19·9 in Wigtown, 19·7 in West Lothian and 19·3 in Aberdeen, to 10·4 in Selkirk, 10·5 in Berwick and 12·2 in Perth.

The proportion of illegitimate births, 6·2 per cent., is 0·1 below that for the previous quarter and 0·6 below the standard for this quarter of the year.

Of the 21,326 births registered, 10,874 were of male children and 10,452 of female children, being 104·0 male births per 100 female. Births registered in October numbered 7,309, in November 6,782 and in December 7,235, the equivalent monthly birth-rates being 17·4, 16·6 and 17·2 respectively.

Marriages.—The number of marriages registered, 9,315, is 2,093 below that for the previous quarter, the rate per 1,000 population, 7·5, being 1·6 below. The number for this quarter is 396 more than the average, while the rate is 0·3 above the average.

The rate in the aggregate of large burghs is 8·6, compared with 6·1 for the rest of Scotland. In individual areas the rate in the large burghs ranged from 18·2 in Inverness, 11·3 in Perth and 10·4 in Aberdeen, to 6·1 in Dumbarton, 6·5 in Kirkcaldy and 6·6 in Motherwell and Wishaw. In counties, exclusive of large burghs, it ranged from 9·6 in Orkney, 8·8 in Wigtown, 8·8 in Bute and 8·7 in Kinross, to 3·9 in Dunbarton, 4·2 in Inverness, 4·5 in Renfrew and 4·5 in Roxburgh.

Marriages registered in October numbered 2,715, in November 2,685 and in December 3,915, the equivalent monthly marriage-rates being 6·4, 6·6 and 9·3 respectively.

Deaths.†—Deaths registered during the quarter numbered 16,629, and equalled a rate of 13·3 per 1,000 population. They are 2,921 more than were registered in the previous quarter, while the rate is 2·3 more. The number and the rate per 1,000 are 555 and 0·3 respectively above the standard for this quarter.

The death-rate in the aggregate of large burghs is 13·9, compared with 12·6 for the rest of Scotland. The rate in individual large burghs ranged from 16·2 in Ayr, 15·3 in Inverness, 15·1 in Port Glasgow and 15·1 in Stirling, to 12·2 in Aberdeen, 12·3 in Clydebank, 12·4 in Hamilton and 12·4 in Falkirk. In counties, exclusive of large burghs, it ranged from 20·8 in Bute, 17·5 in Orkney and 16·9 in Kinross, to 9·6 in Peebles, 10·9 in Midlothian and 11·0 in Kincardine.

Deaths registered in October numbered 5,071, in November 5,429

* The standard adopted for comparative purposes is the average of the same number and rate for the corresponding quarters of the five preceding years.

† *Note.*—Where the place of death differs from the place of usual residence of the deceased, such death, for the purpose of these statistics, is allocated to the place of usual residence if in Scotland.

and in December 6,129, the equivalent monthly death-rates being 12·0, 13·3 and 14·6 respectively.

Infantile Mortality.—Deaths of children aged under one year numbered 1,819, and are equivalent to an infantile mortality-rate of 85 per 1,000 registered live births. These deaths are 442 more than in the previous quarter and the rate is 21 more. Compared with the standard for this quarter the rate is 3 more. Among legitimate children the mortality was 83 per 1,000 births and among illegitimate children 113.

The death-rate for the large burghs was 102, while for the rest of Scotland it was 64. In the large burghs individually it ranged from 132 in Glasgow, 128 in Rutherglen and 120 in Port Glasgow, to 0 in Arbroath, 34 in Inverness and 42 in Dunfermline. In counties, exclusive of large burghs, it ranged from 106 in Clackmannan and 88 in Lanark, to 0 in Kinross and in Nairn, 14 in Berwick and 26 in Caithness.

Causes of Death.—Principal Epidemic Diseases.—Of the 16,629 deaths registered during the quarter, 566 or 3·4 per cent. were attributed to the principal epidemic diseases. These deaths include 18 from measles, 36 from scarlet fever, 126 from whooping-cough, 105 from diphtheria, 172 from influenza, 25 from cerebro-spinal fever and 84 others. Compared with the previous quarter the main feature in this group is an increase in the deaths from each of these causes with the exception of measles and cerebro-spinal fever, which show a decrease. Deaths from measles are 56 fewer, from scarlet fever 7 more, from whooping-cough 23 more, from diphtheria 26 more, from influenza 123 more, from cerebro-spinal fever 2 fewer, and from other epidemic diseases 21 more. The death-rate for the group as a whole was 45 per 100,000 of population, which is 16 below the average for the quarter. The rate from measles is 7 less than the average, from scarlet fever 3 less, from whooping-cough 3 more, from diphtheria 1 less, from influenza 6 less, and from cerebro-spinal fever 1 less. In the large burghs the highest rates were 1·6 in Ayr, 1·2 in Coatbridge and 1·1 in Rutherglen, while in counties, exclusive of large burghs, the highest were 1·0 in Clackmannan and in Stirling, and 0·8 in West Lothian.

Tuberculosis.—Deaths from all forms of tuberculosis, 826, account for 5·0 per cent. of all deaths and are 8 more than in the previous quarter. Of them 649 were ascribed to tuberculosis of the respiratory system, an increase of 61 compared with the previous quarter, 73 to tuberculosis of the central nervous system, a decrease of 31, 32 to abdominal tuberculosis, a decrease of 11, and 72 to other forms of tuberculosis, a decrease of 11. The quarterly death-rate from all forms of tuberculosis is 66 per 100,000 compared with an average of 71 for this quarter, that from respiratory tuberculosis being 52 compared with the average of 54.

Malignant Disease.—Deaths from this cause numbered 2,092, account for 12·6 per cent. of the total deaths, and equal a rate of 167 per 100,000. These deaths are 171 more than in the previous quarter, while the rate is 11 above the average.

Respiratory Diseases.—Deaths from pneumonia and bronchitis numbered 1,246 and 802 respectively, and show an increase compared with the previous quarter, those from pneumonia being 638 more and those

from bronchitis 437 more. Pneumonia was responsible for 7·5 per cent. of the total deaths and bronchitis for 4·8 per cent. The corresponding death-rates per 100,000 population are 100 and 64 respectively, the standard rates for the present quarter being 98 and 67 respectively.

Pregnancy and Childbirth.—Deaths of mothers from diseases and accidents of pregnancy and childbirth numbered 112 and are equal to a rate of 5·3 per 1,000 live births. This rate is 1·4 below the standard for the quarter.

Violence.—Deaths from violence numbered 685, account for 4·1 per cent. of all deaths, and are equivalent to a rate of 55 per 100,000. These deaths are 10 fewer than in the previous quarter. Of the total deaths assigned to this group 152 were attributed to accidents with motor vehicles, which is 1 more than were recorded in the previous quarter. The death-rate from violence is 1 below the standard for this period.

For comparative purposes the accompanying table is given showing the death-rates from several important causes in the present quarter, the previous quarter, and the average rate for the same quarter of the previous five years. Reference has already been made to the principal features brought out by the table.

CAUSES OF DEATH.	Death-rates per 100,000 population.

114 (a) Chronic interstitial pneumonia	13	10	3	1	1	3	2	5	...	1		
(b) 1. Gangrene of lung	3	1	2	1	2		
2. Other diseases of respira- tory system	11	8	3	1	1	1	3	3	2	...		

TABLE III.—continued.

	All Ages.			Age.														85 and over
	Both Sexes.	Males.	Females.	-1	1-	5-	10-	15-	25-	35-	45-	55-	65-	75-				
IX. DISEASES OF DIGESTIVE SYSTEM.																		
115 (1) Diseases of teeth and gums . . .	6	1	5	2	2	1	1			
(2) Diseases of tonsils . . .	16	4	12	1	2	1	...	2	2	1	2	3	1	1	...			
(3) Other diseases of buccal cavity or pharynx . . .	20	7	13	3	...	1	...	1	2	2	2	1	3	5	...			
116 Diseases of oesophagus . . .	3	1	2	1	2	...			
117 (a) Ulcer of stomach . . .	90	59	31	1	9	12	19	15	19	14	1			
(b) Ulcer of duodenum . . .	79	69	10	2	12	10	17	18	12	8	...			
118 Other diseases of stomach . . .	31	16	15	6	1	2	3	11	6	2			
119 Diarrhoea and enteritis (under 2 years) . . .	262	164	98	235	27			
120 (a) Diarrhoea and enteritis (over 2 years) . . .	57	20	37	...	10	4	2	2	4	4	2	7	6	14	2			
(b) Ulceration of intestines . . .	13	5	8	1	5	3	...	2	2			
121 Appendicitis . . .	105	63	42	...	7	11	7	17	11	14	12	10	12	3	1			
122 (a) Hernia . . .	61	26	35	4	2	3	3	12	16	17	4			
(b) Intestinal obstruction . . .	74	40	34	7	1	3	...	4	2	4	10	18	9	11	5			
123 Other diseases of intestines . . .	22	12	10	...	1	2	1	...	3	2	5	7	1			
124 Cirrhosis of liver . . .	49	33	16	1	1	...	11	15	16	3	2			
125 (1) Acute yellow atrophy of liver . .	3	1	2	1	...	1	...	1			
(2) Other diseases of liver . . .	5	4	1	1	1	...	1	1	1			
126 Biliary calculi . . .	24	5	19	1	1	1	10	8	3	...			
127 (1) Cholecystitis . . .	61	9	52	2	7	14	18	16	4			
(2) Other diseases of gall bladder and ducts . . .	6	2	4	1	1	2	2			
128 Diseases of pancreas . . .	12	5	7	1	4	1	3	3			
129 Peritonitis without stated cause . .	10	2	8	2	1	1	...	1	...	1	...	4			
X. NON-VEREREAL DISEASES OF GENITO-URINARY SYSTEM.																		
130 Acute nephritis . . .	30	13	17	2	...	5	2	1	3	3	2	2	8	2	...			
131 Chronic nephritis . . .	333	159	174	3	7	11	18	55	89	98	43	9			
132 Nephritis unspecified . . .	96	42	54	1	2	2	4	8	17	20	26	15	1			
133 Other dis. of kidney and annexa . .	49	25	24	3	4	3	5	11	8	7	7	1			
134 Calculi of urinary passages . . .	13	6	7	1	1	...	2	7	...	2	...			
135 Diseases of bladder . . .	48	32	16	2	1	1	1	7	11	19	6			
136 Dis. of urethra, urinary abscess, &c. .	12	12	4	4	3	1	...			
137 Diseases of prostate . . .	132	132	1	15	48	60	8			
138 Diseases of male genital organs . .	3	3	1	1	1			
139 (a) Diseases of ovary, fallopian tube and parametrium . . .	13	...	13	4	3	4	2			
(b) Diseases of uterus . . .	11	...	11	3	1	2	3	1	1			
(c) Diseases of breast			
(d) Other diseases of female genital organs . . .	1	...	1	1	...			
XI. DISEASES OF PREGNANCY AND CHILDBIRTH.																		
140 Post-abortion sepsis . . .	6	...	6	5	1			
141 Abortion not returned as septic . .	5	...	5	2	1	2			
142 Ectopic gestation . . .	2	...	2	2			
143 Other accidents of pregnancy			
144 (a) Placenta prævia . . .	5	...	5	1	1	3			
(b) 1. Accidental hæmorrhage . . .	3	...	3	2	1			
2. Oth. puerperal hæmorrhage . . .	6	...	6	1	2	3			
145 Puerperal sepsis . . .	39	...	39	13	21	5			
146 Puerperal albuminuria, Convulsions .	16	...	16	6	3	7			
147 (1) Uncontrollable vomiting . . .	7	...	7	6	1			
(2) Other toxæmias of pregnancy . .	4	...	4	2	1	1			
148 Puerperal phlegmasia alba dolens, Embolism . . .	8	...	8	3	1	4			
149 Other accidents of childbirth . .	10	...	10	1	7	2			
150 Other or unspecified conditions of the puerperal state . . .	1	...	1	1			

TABLE III.—continued.

	All Ages.			Age.											
	Both Sexes.	Males.	Females.	-1	1-	5-	10-	15-	25-	35-	45-	55-	65-	75-	85 and over.
XII. DISEASES OF SKIN AND CELLULAR TISSUE.															
151 Carbuncle, Boil	11	5	6	1	2	1	...	2	3	2	...
152 Cellulitis, Acute abscess . . .	43	31	12	10	2	...	2	3	6	5	5	1	5	4	...
153 Other dis. of skin and its annexa	15	9	6	1	4	1	2	1	...	4	2
XIII. DISEASES OF BONES AND ORGANS OF LOCOMOTION.															
154 Acute infective osteomyelitis and periostitis	28	20	8	2	2	8	5	5	3	...	2	1
155 Other diseases of bones . . .	2	2	1	...	1
156 Diseases of joints and other organs of locomotion	11	7	4	2	1	...	3	1	2	1	...	1	...
XIV. CONGENITAL MALFORMATIONS.															
157 Congenital malformations . .	154	89	65	144	6	2	...	1	1
XV. DISEASES OF EARLY INFANCY.															
158 Congenital debility	160	88	72	160
159 Premature birth	402	223	179	402
160 Injury at birth	48	32	16	48
